[illegible]

Common Laboratory equipment: معدات المختبر المشتركة

- Refrigerator
- Freezer
- Centrifuge
- Microscope
- Electronic scales
- Water bath

Microbiology:

- Incubator 37 °C → 54°C
- Microscope Objectives 10 – 20 - 40/50 - 100 immersion
- Fume Hood
- Refrigerator
- Freezer 30 ° - 300 L
- Centrifuge
- Water distiller 41/h
- Biologic safety cabinet
- Stomacher
- Water bath
- Slide warmer
- Vortex
- Shaker
- Incinerator (electric or gas)
- Autoclave
- Incubation jars

Hematology:

- Cell Counter minimum 3 populations WBC, red cells, platelets
- Microscope to include oil immersion
- Coagulometer
- Refrigerator
- Vortex
- Neu-Bauer counting chamber or cell count chamber for body fluids

Serology:

- Micro plate reader
- Water bath
- Centrifuge
- Refrigerator
- Micropipette

Biochemistry:

- Electrolytes analyzer
- Centrifuge
- Refrigerator
- Electronic Balance 0.1 mg
- Spectrophotometer 300-900 nm
- Automated analyzer (colorimetric, turbidometric)
- Automated immune analyzer

Histopathology:

- Tissue processor
- Embedding station
- Microtome with water bath
- Microscope
- Incubator 65-80 °C
- Fume hood
- Freezer for ice making
- Scale
